

# SERGII BORODIN

## Web Developer

I'm a focused, responsible, full of energy enthusiast-frontend web developer. I finished a 9-month intensive Web Development bootcamp from HackYourFuture in Århus.

I want to work as a professional web developer, because I want to make people's lives easier and more interactive by making apps aesthetic, convenient, and user-friendly. And I want to work for a company that has the same philosophy. This point can motivate me a lot to do my best work.
