

Sergii Borodin, Frontend Developer

I am a focused, responsible, full-of-energy, enthusiastic web developer. I do learn web development for more than two years. During this period, I finished two 10-month-long bootcamps, and now, I'm taking my second internship in a company called NordInsight as an intern Frontend developer. Working on a project, I prefer to take on new kinds of tasks and explore new technology to get broad and up-to-date knowledge. In my free time, I'm glad to volunteer at HYF school to help people who have just started studying programming.
