I'm a focused, responsible, full of energy enthusiast web developer. I finished a 9-month intensive Web Development Bootcamp from HackYourFuture in Århus. Currently, I volunteer my time at HYF school to help people who have just started to learn web development and continuously improve my knowledge.

Web development appeal to me because I want to make people's lives easier, more interactive, and more comfortable by making apps aesthetic, convenient, and user-friendly. And I wish to work for a company that has the same philosophy.

SERGII BORODIN   Web Developer
