PROFILE

Frontend-focused Software Developer with over 3 years of hands-on experience, working across the React ecosystem — React.js and Next.js for web, React Native and Expo for mobile. Shipped a production mobile app end-to-end to both the App Store and Google Play. Since then: built two full-stack web projects from scratch (LMS SaaS with AI voice integration; event booking platform), and continues to volunteer as a mentor at HackYourFuture Aarhus. Active user of AI-assisted development tools and Playwright for end-to-end testing.

EXPERIENCE

Volunteer Mentor · HackYourFuture Aarhus · Aarhus

2022 – present · Active cohorts: Jul 2025, Jun–Jul 2026

- Facilitate online sessions for bootcamp graduate teams — explaining concepts, advising on workflow, and supporting team collaboration through final projects.
- Conduct GitHub code reviews; coach on Git workflow, Agile/MVP execution, and maintaining momentum under deadline pressure.

Software Developer · Jutlandia · Esbjerg

Oct 2025 – Nov 2025 · Internship (required from Varde kommune)

- Built a warehouse rental management system in Angular, leveraging Cursor's agent capabilities to accelerate delivery.
- Implemented an interactive map and calendar with slot-level tracking, rental duration handling, and status workflows.

Stack: Angular, Cursor

Software Developer · Kazboo · Kolding

Jan 2024 – May 2025

- Architected a React Native & Expo application from scratch — file-based routing, tab and modal navigation, scalable project structure.
- Implemented JWT auth with Auth Guard and Secure Storage, Redux for app-wide state, and real-time chat via FCM push notifications.
- Integrated native camera capture with S3 upload; shipped to both App Store and Google Play across the full cycle: design review, development, testing, code review.
- Ran and integrated with a legacy .NET backend locally after several days of troubleshooting — end-to-end ownership mindset.

Stack: React Native, Expo, TypeScript, Redux, Tailwind, FCM, JWT, Secure Storage, S3, Swagger

Full-Stack Developer · NordInsight · Copenhagen

Jul 2023 – Nov 2023

- Developed a browser-based medical implant registry using React.js, Next.js, TypeScript, Node.js, Express.js, and MongoDB.
- Redesigned UI components for consistency and responsiveness; integrated third-party APIs and optimised backend database interactions.

Stack: React.js, Next.js, TypeScript, Node.js, Express.js, MongoDB

Frontend Developer · UNO econetwork · Aarhus

Jan 2023 – June 2023

- Built and structured a sustainability platform in React.js — routing, navigation, and core component architecture.

Stack: React.js, Styled-Components

PERSONAL PROJECTS

Talkin — LMS SaaS Platform · Personal project · live

Aug – Sep 2025

- Real-time AI-powered learning management system built from scratch — user authentication via Clerk, AI voice agent sessions via Vapi, interactive teaching delivery.
- Full SaaS architecture with Next.js App Router, Supabase for database and real-time functionality.

Stack: Next.js, TypeScript, Supabase, Clerk, Vapi, Tailwind

Padel Event Booking Platform · Personal project · in progress

Apr 2026 – present

- Full-stack booking platform for padel events and court reservations — Next.js 15 App Router, server actions, protected routes, complete booking management system.
- Firebase Auth (session cookie flow), MongoDB + Mongoose for data modelling.

Stack: Next.js 15, TypeScript, MongoDB, Mongoose, Firebase Auth, Tailwind
