SUMMARY

Frontend-focused Software Developer with 2.5 years of hands-on development experience across commercial and internship roles — commercial role at Kazboo (2024–25) plus internships run within real team workflows, alongside self-directed SaaS projects (Talkin, Padel platform) shipped independently. Works across the React ecosystem — React.js and Next.js for web, React Native and Expo for mobile. Practical exposure to backend technologies (Node.js, Express, MongoDB, Supabase). Active user of AI-assisted development tools. Experience with end-to-end testing via Playwright. Ongoing volunteer mentor at HackYourFuture Aarhus since 2022.

COMMERCIAL EXPERIENCE

Software Developer · Kazboo · Kolding

Jan 2024 – May 2025

- Architected a React Native & Expo application from scratch — file-based routing, tab and modal navigation, scalable project structure.
- Implemented secure authentication with an Auth Guard, JWT storage via Secure Storage, and Redux for app-wide state management.
- Integrated native camera capture with S3 upload, real-time push notifications, and chat functionality using FCM.
- Shipped the app to both the App Store and Google Play, contributing across the full cycle — design review, development, testing, and code review.
- Ran and integrated with a legacy .NET backend locally after several days of troubleshooting — end-to-end ownership mindset.

Stack: React Native, Expo, TypeScript, Redux, Tailwind, FCM, JWT, Secure Storage, S3, Swagger

INTERSHIPS

Software Developer Internship · Jutlandia · Esbjerg

Oct 2025 – Nov 2025

- Built a warehouse rental management system in Angular, working solo and leveraging Cursor's agent capabilities to accelerate delivery.
- Implemented an interactive map and calendar with slot-level tracking, rental duration handling, and status workflows.

Stack: Angular, Cursor

Full-Stack Developer Internship · NordInsight · Copenhagen

Jul 2023 – Nov 2023

- Built a browser-based MRI implant safety platform for radiographers and radiologists, using React.js, Next.js, TypeScript, Node.js, Express.js, and MongoDB.
- Built a multi-field implant submission form — structured description/metadata inputs plus image uploads to a dedicated server-side storage folder.
- Redesigned UI components for consistency and responsiveness; integrated third-party APIs and optimised backend database interactions.
- Worked within a commercial-style team workflow — Git branching, Notion-tracked tickets, Slack-based async communication.

Stack: React.js, Next.js, TypeScript, Node.js, Express.js, MongoDB

Frontend Developer Internship · UNO econetwork · Aarhus

Jan 2023 – June 2023

- Built and structured a sustainability platform in React.js — routing, navigation, and core component architecture.
- Embedded in the team's standard workflow — PR review, Jira-tracked tickets, regular team communication.

Stack: React.js, Styled-Components

PERSONAL PROJECTS

Talkin — LMS SaaS Platform · Personal project · live

Aug – Sep 2025

- Real-time AI-powered learning management system built from scratch — user authentication via Clerk, AI voice agent sessions via Vapi, interactive teaching delivery.
- Full SaaS architecture with Next.js App Router, Supabase for database and real-time functionality.

Stack: Next.js, TypeScript, Supabase, Clerk, Vapi, Tailwind

Repo: https://github.com/sergii-borodin/ai_saas_app **Live:** <https://ai-saas-app-ten-blush.vercel.app/>

Padel Event Booking Platform · Personal project · live

Apr 2026 – present

- Full-stack booking platform for padel events and court reservations — Next.js 15 App Router, server actions, protected routes, complete booking management system.
- Firebase Auth (session cookie flow), MongoDB + Mongoose for data modelling.

Stack: Next.js 15, TypeScript, MongoDB, Mongoose, Firebase Auth, Tailwind

Repo: <https://github.com/sergii-borodin/padel-events-platform> **Live:** <https://padel-events-platform.vercel.app/>

MENTORING / VOLUNTEERING

Volunteer Mentor · HackYourFuture Aarhus · Aarhus

2022 – present (mentoring intensified May 2025 – present)

- Support bootcamp graduate teams — many facing barriers to the Danish job market — through their final capstone projects, as part of HYF's mission to help trainees land their first tech role.
- Facilitate online sessions for bootcamp graduate teams — explaining concepts, advising on workflow, and supporting team collaboration through final projects.
- Conduct GitHub code reviews; coach teams on Git workflow, Agile/MVP execution, and maintaining momentum under deadline pressure.
- Sustained, active involvement across multiple cohorts since 2022, including the current Jun–Jul 2026 final project cohort — kept technical and code-review skills continuously exercised alongside independent project work (Talkin, Padel platform).

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, Redux, React Native, Expo, Angular

Backend: Node.js, Express.js, .NET 8, MongoDB, Supabase, MySQL

Auth & APIs: Firebase Auth, Clerk, JWT, Vapi, REST API

Styling & UI: Tailwind, MUI, Figma, Storybook

Tools: Git, Cursor, Notion, Jira, Swagger, Postman

Other: Agile, CI/CD, Playwright

EDUCATION & CERTIFICATIONS

QA Course – Playwright (Merkle / HYF) | Feb – Mar 2025

C# .NET 8 with MS SQL | Certificate | Feb 2024

Umbraco Professional | Certificate | Nov 2022

GOIT Academy – Full Stack Development Course | Jul 2022 – May 2023

HackYourFuture – Full Stack Developer, Aarhus | Nov 2021 – Jul 2022

LNAU, Ukraine – Engineer / Bachelor's Degree | 2006 – 2011
